XL-250 XTRON OIL

Less Friction | More Efficiency

High Temperature Synthetic Oil

ABOUT XL 250 XTRON OIL

TIDC India, a leading chain manufacturer based on extensive research and expertise has developed this unique **"XL 250 XTRON OIL"**, **HIGH TEMPERATURE LUBRICANT**, made out of a compound mixture of synthetic oil and solid lubricants. This is a multipurpose chain lubricant to protect the chain and other mechanical devices from wear and corrosion.

HOW TO USE

- Clean the surface before application
- Use clean nylon brushes to apply the oil
- Ensure the entire chain is lubricated with oil
- Relubricate if the chain is found to be running dry
- Use online lubricator for effective penetration

SAFETY INSTRUCTIONS

- Do not store it above 50° C.
- Do not store near heat, flame, spark & ignition source
- Keep away from children

APPLICATION

- Suitable for chains and moving parts, operating at very high temperatures from (-)30° C to 250° C
- Dusty & Dirty environments
- Water & Steam environments
- Slow / High Speed applications
- Low / High load applications

FIRST AID

- Swallow / Ingestion – Rush for medical assistance
- Eye contact – Repeated wash with cold water and take medical assistance
- Skin contact – Wash with water and clean with mild soap water
