# COMBINE HARVESTER CUTTER BLADES

## TIDC India blades offer you

Excellent Chopping Output

High tolerance to Foreign objects

Optimal service life

Precision coordination

TIDC India has come up with Combine Harvester Cutter Blades for delivering a precise and uniform chop quality in the harvest. The high precision manufacture and consistent high quality of our blades ensure longer life and better output. Our blades are Heat Treated and additionally Induction Hardened to strict TIDC India specifications. The result is a blade that slices effortlessly through the crop with absolute efficiency and reliability, even under adverse harvesting conditions.

Our blades offer more than just the right dimensions. The materials and manufacturing methods we use are fundamental to the reliability and long service life of our parts. Our blades are manufactured from materials of an exceptionally high quality and to precise TIDC India specifications on the basis of proven expert knowledge.

### CUSTOM MADE
